Frequently asked questions

Do you have some hidden costs linked to the number of messages exchanged?

We don't want you to worry about how much Joonbot will cost you every month, that's why our pricing is fixed, no hidden costs.

Whatever your chatbot has 50 000 or 5 millions interactions, you'll pay the same price.

Can I cancel my plan anytime?

Yes, you can cancel any time without justification or hidden costs.

Just go to the 'Plan & billing' section and click on 'Cancel your subscription' button.

What if I want to change plans?

You can change your plan any time directly from your Joonbot dashboard in the 'Plan & billing' section.

Do I need to know how to code?

Not at all, you only need basic copy/paste skills for the setup :).

You can also use our email and Zapier integrations to automate process, no coding is required.

However, if you want to use our webhook feature, you need to code. For info, some native integrations are coming soon!

Is it possible to add teammates or multiple clients under one account?

You will soon be able to do it. It will be available in the plus plan as an add-on.

Are you GDPR compliant?

Yes, we are. As creator of the identified users, you are considered the data controller within the meaning of the GDPR, and Arnica is acting only as a data processor. For more detailed information, please have a look at our [privacy policy](#).

Where does the data go?

We store the data on servers. We created features that will allow you to get the data and use it the way you want.

First, you can see all conversations your chatbots had with users on the results tab.

Using our integrations, you can send data to Google Sheets, Airtable and many more apps. You can also send it to your own backoffice.

You can also export data as CSV, so you'll access to ended and unfinished conversations.

On which platforms are Joonbot available?

We only focus on chatbots for websites. We want to rely only on our own technology to get your data safe.

Does Joonbot work with Artificial Intelligence?

No. The mechanism is rule-based, you define your conversational scenarios in advance.

With AI, you need to spend a lot of time training your chatbot. With Joonbot you can build your chatbot in minutes!

The chatbot leads the conversation and aims to lead the user to a specific action depending on the previous ones.

No bad experiences, everybody is happy!

Can I install Joonbots on several websites?

Yes! You can install chatbots on different websites, it's unlimited.

I have more questions

You can have a look at our help center or our product page if you want to know more about the next features to come.

You can also send an email to Camille at camille@joonbot.com.
